

It's Time to Trade Up

Trade in your power analyzer for the NEW **4500C**

15% trade in for a 4500B | 10% trade in for any 4500/4400 models

4500C Peak Power Analyzer

High performance benchtop RF and μ wave peak power analyzer capable of measurements from 30 MHz to 40 GHz with 5 ns rise time, 125 MHz VBW, and 100 ps time resolution. Boonton's unique Real-Time Power Processing™ delivers 100,000 measurements per second.

The 4500C is a performance enhanced drop-in, code-compatible replacement to the 4500B with the same front panel controls and graphical user interface (GUI), eliminating the need to change any test procedures designed around the 4500B.

For more information, contact your [local salesperson](#), click [here](#), or call 973-386-9696.

This offer cannot be combined with any other promotions. Discount applied to the list price of the 4500C. Valid until 12/13/2019.
